Mounted the viewfinder on my Gamo pellet rifle, what came with it was rubbish, he should have constantly seen in. Installed the new Barska viewfinder and they didn't have a bit of a problem with the moving viewfinder, spotted in and the big shotgun now, this is my second Barska field of application and I really like both, quality scope for the price. Pros: Cons: I would recommend: Yes 0 of 0 found the following review useful. Was it useful to you? Yes. No, you said this review wasn't helpful. Do you want to change your vote? Report Abuse Share I mounted this scope on my Marlin 79 using Umarex USA RWS Lockdown Scope Mount. I saw the scope yesterday without any problems. The adjustments were easy and precise. I don't expect any problem with the moving viewfinder on the rifle with the support I used. So far I am very happy with this scope, it seems to be exactly what I was looking for for my .22. The field of view is good and clear. Pros: Easy to assemble, holds the Setting Cons: I would recommend: Yes 3 of 3 found the following review useful. Was it useful to you? Yes. No, you said this review wasn't helpful. Do you want to change your vote? Report Abuse Share I received the scope in a timely manner. I bought it for an old .22 bolt action with weaver cuts in the receiver/barrel. Non-regent supports. Fits well on a Marlin model 60 bolt action .22. This would probably be better for a 10-22 type support that is not cut in the receiver/barrel. The scope itself seems to work well, easy to reset. I didn't put a lot of laps through with it mounted, so time will tell if it holds zero well. I would recommend: Yes 0 of 1 found the following review useful. Was it useful to you? Yes.
